

FIO Addresses On Ethereum Proposal — ScopeLift

Ben DiFrancesco, Proprietor of ScopeLift

June 12, 2020

This document contains a brief proposal for software consulting work to be done by ScopeLift on behalf of Luke Stokes.

The estimates in this proposal are based on currently available information and are made without obligation or guarantee, express or implied. Nothing in this document shall be construed as legally binding upon any involved parties.

The work to be done is summarized as follows:

- Repurpose the contracts and JavaScript library developed for Splinterlands cards to function with metadata associated with FIO addresses
- Update versions of Solidity, node.js, and all tools/dependencies used in the project to latest versions
- Rename variables and package names as appropriate to fit the domain
- Collaborate with the client's developers to provide support for their integration and testing of integration on an Ethereum testnet
- Deploy all contracts to the Ethereum mainnet and transfer ownership to an address of the client's choosing

Estimated level of effort: ~10-15 hours

ScopeLift hourly rate: 150 USD / hour

Expected total cost: ~1,500 – 2,250 USD

Payment terms: Net 30; billed at the end of each month and upon completion of project

Payment methods: Check, ACH, or Dai/USDC Stablecoins
